WORK EXPERIENCE

UX CONSULTANT, FREELANCE
October 2019 - Present

Hired to revamp the ZamQuests website and mobile application. Responsibilities include:
- UX Research - stakeholder and user interviewing
- Wireframing - low and high fidelity mockups and prototyping via AdobeXD.
- Interface and Visual Design - custom flat illustrations and animations
- Web Development (HTML5, CSS3, Boostrap4) and Responsive Web Design.

UXUI SPECIALIST, CALIFORNIA ENERGY REGISTRY
June 2019 - August 2019

Interviewed current customers to diagnose user issues, find areas of improvement in the existing software, and discover new products to benefit the current user base. I also worked with the developer creating user workflows for new features, designing wireframes and prototypes, and presenting my work to the rest of the team.

STYLIST, URBAN OUTFITTERS
October 2016 - June 2019
- Provided exceptional customer service, managed fitting rooms & sales floor
- Visual merchandising & product display

STYLIST, LEVI STRAUSS & CO.
March 2012 - October 2016
- Cash handling & leading a team
- Promoted to supervisor (August 2014 - July 2015)

PROJECTS

MySQL
Created an Entity Relationship diagram, given a set of specifications, using MySQL Workbench (DBMS) to implement a database. Simulated a bank; consisting of customers, employees, accounts, and transactions. Created views, procedures, and functions to query the database. https://github.com/yusufamani/MySQL_Database.git

Senior Project - Front-End Web Developer
My group worked with CareRight Technologies to create a web application that serves as a data model to read, interpret, analyze, and visually present their data. Developing the front-end and creating the website application using JSON, HTML, CSS, JavaScript, Flask, and Python. https://github.com/csusBlackbox/Senior_Project_2019.git
